Diffraction

Presented by Tanmay

Borse, Sakec

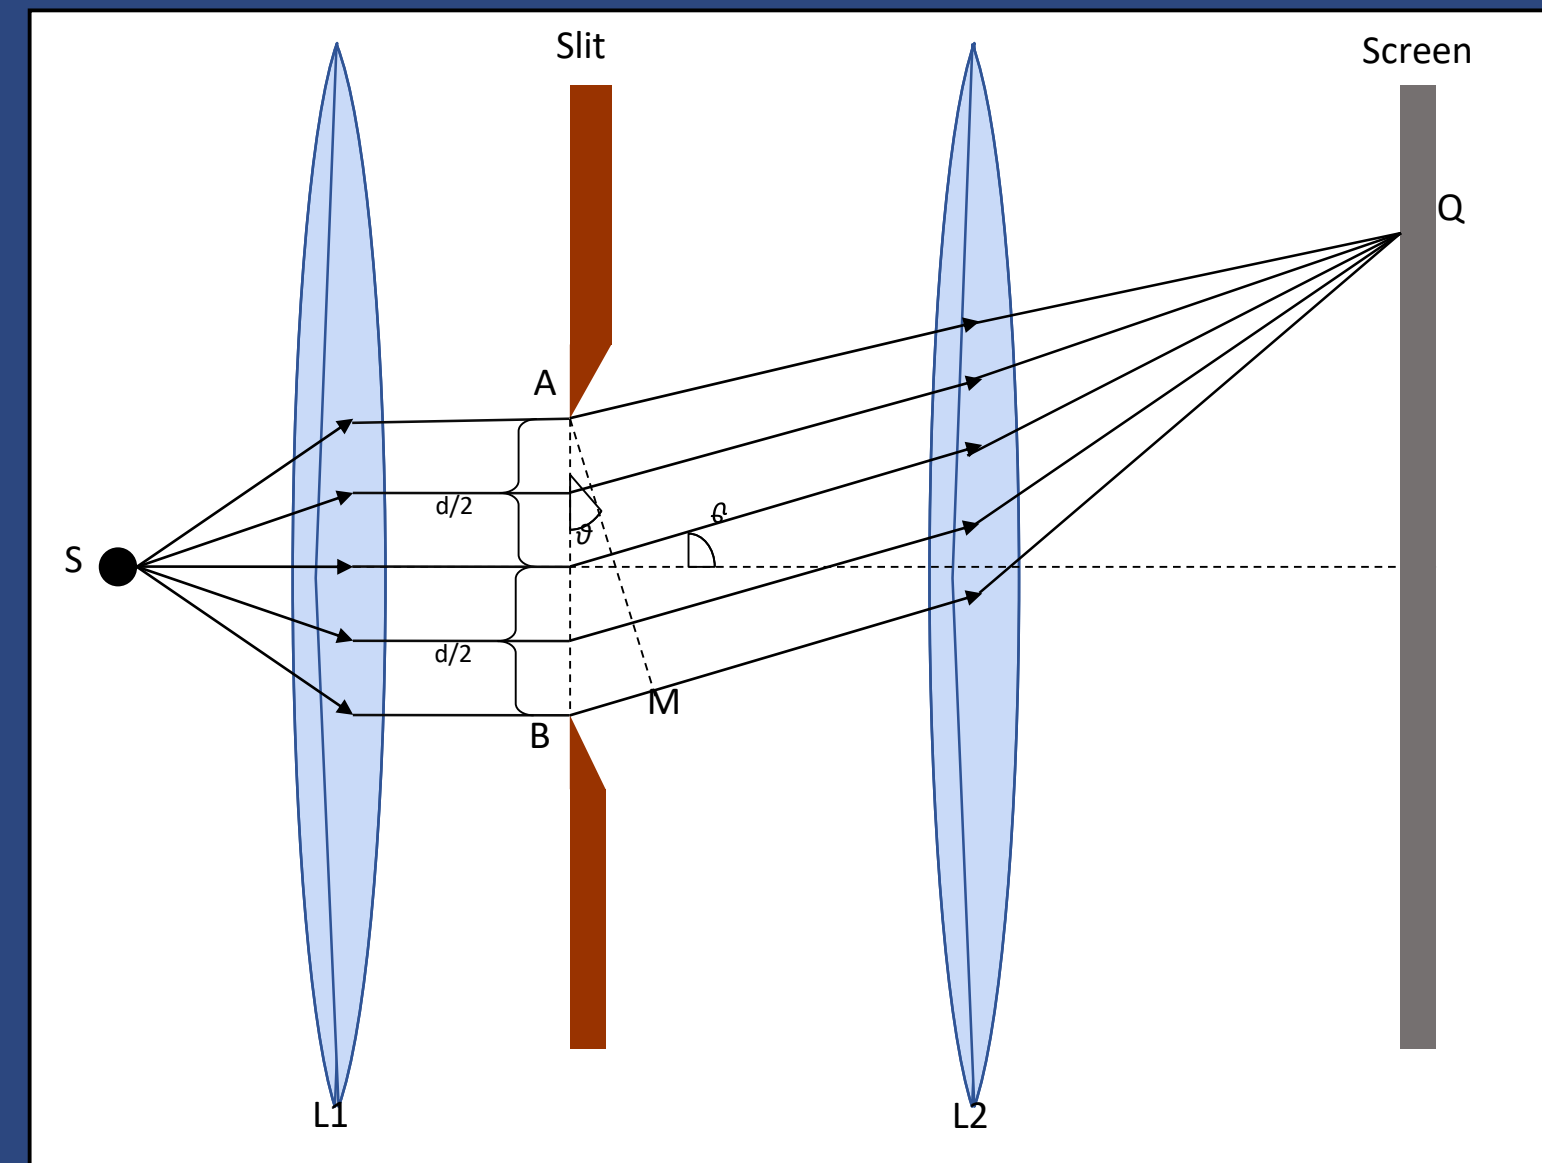

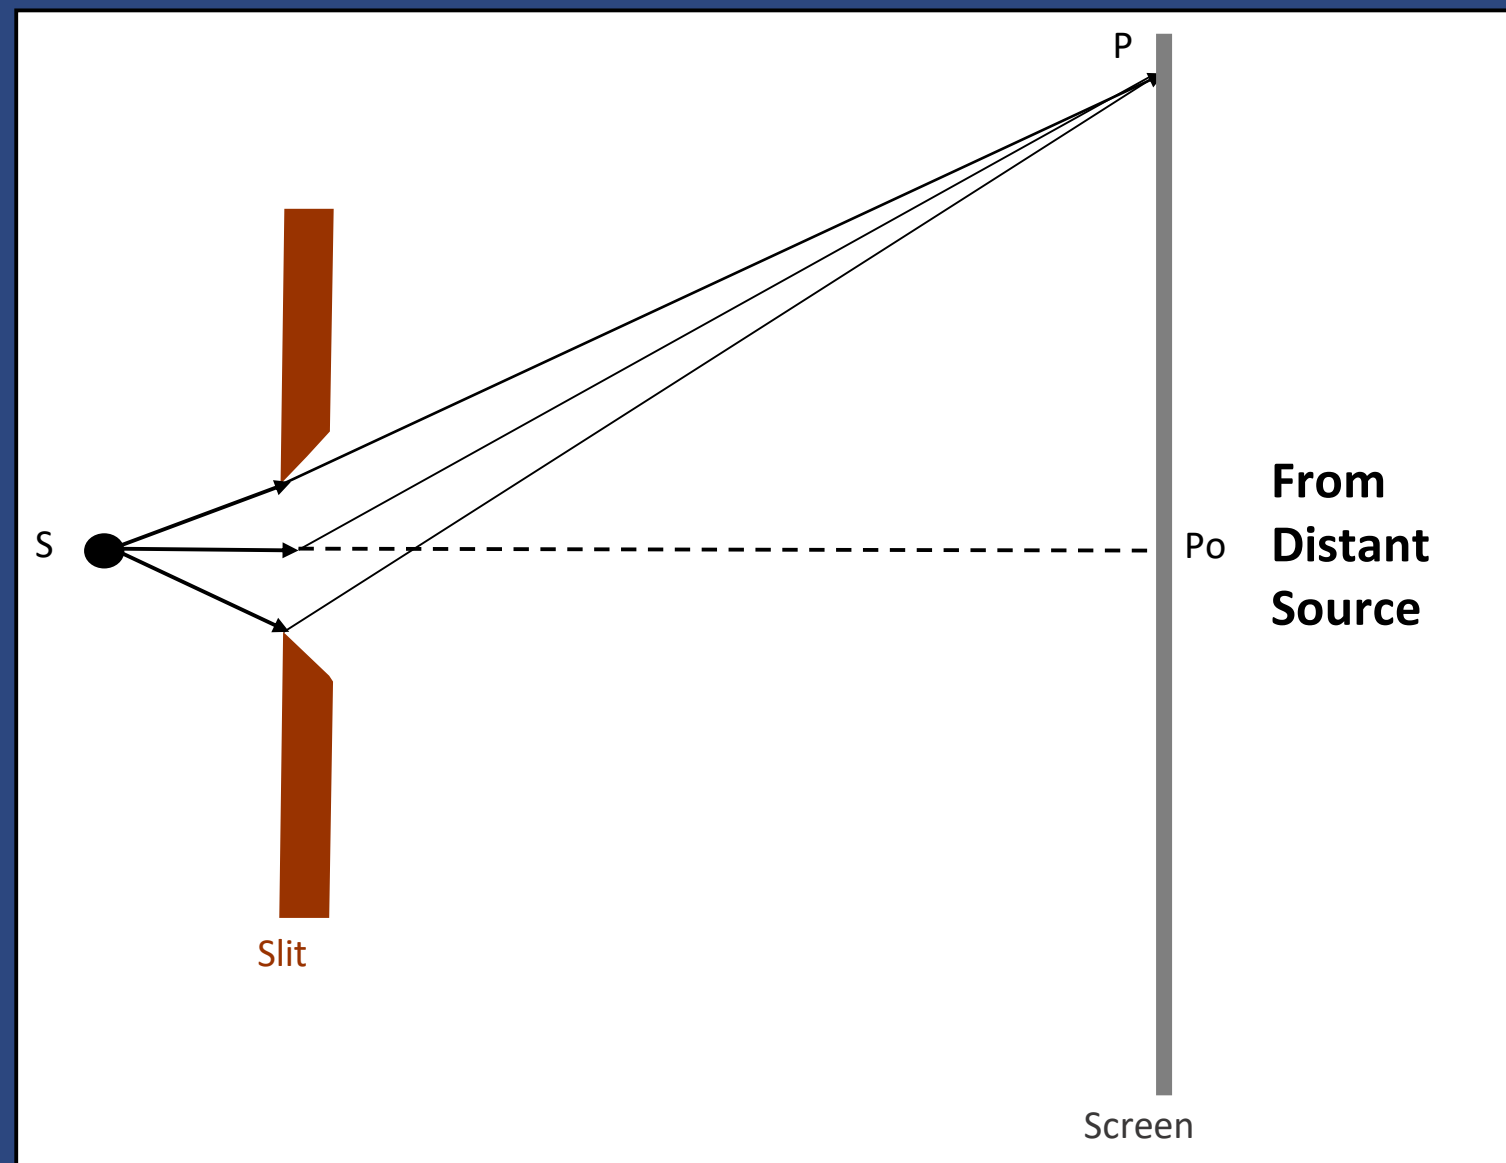

CONTENTS

□ **Diffraction**

□ **Fresnel and Fraunhofer**

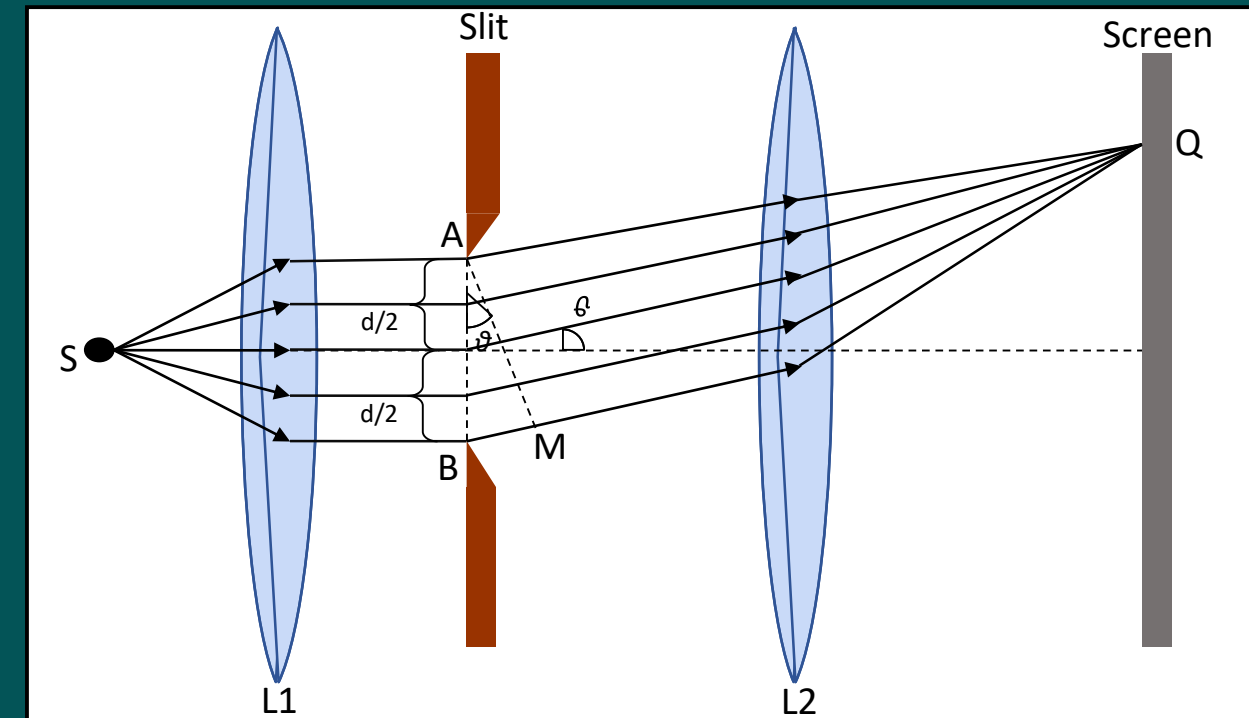

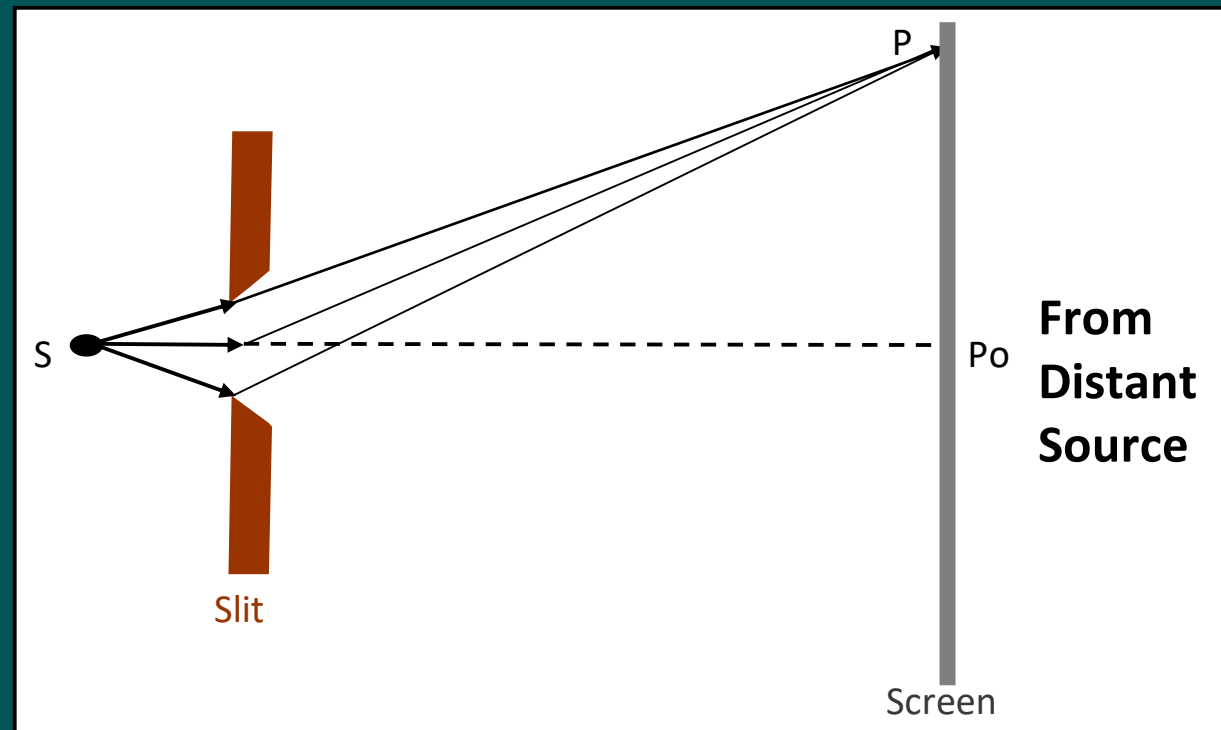

What is Diffraction?

Diffraction : As waves come into contact with obstacles (or openings), they bend around the edges of the obstacles if the obstacles' dimensions are equal to the waves' wavelength. Diffraction is the bending of waves around the edges of an obstacle (or opening).

Fresnel & Fraunhofer

Basically, the diffraction phenomenon has two main types:

Fresnel Diffraction	Fraunhofer Diffraction
The source and slits are both at finite distance from the slit.	The source and slits are at infinite distance from the slit.
Wavefronts are cylindrical or spherical .	Wavefronts are plane .
The incident and diffracted rays are divergent .	The incident and diffracted rays are parallel .
Lenses are not required in actual experiment.	Two convex lenses are used in experiment to achieve parallel wavefront.
The initial phase of secondary wavelets is different at different points in the plane of the aperture.	The initial phase of secondary wavelets is same at all points in the plane of the aperture.

INTRODUCTION

Start inspired with thousands of templates, collaborate with ease, and engage your audience with a memorable Canva Presentation.

Apply page animations and transitions to your Canva Presentation to emphasize ideas and make them even more memorable.

GOALS

Our First Goal

Pre-record your Canva presentation to present anytime, anywhere.

Our Second Goal

Pre-record your Canva presentation to present anytime, anywhere.

Our Third Goal

Pre-record your Canva presentation to present anytime, anywhere.

MAIN CONCEPTS

The First Concept

Pre-record your Canva presentation to present anytime, anywhere.

The Second Concept

Pre-record your Canva presentation to present anytime, anywhere.

The Third Concept

Pre-record your Canva presentation to present anytime, anywhere.

BACKGROUND

General Overview

Present with ease and wow any audience with Canva Presentations. Choose from over a thousand templates to fit any objective or topic.

History

With Canva Presentations, you can collaborate in real-time with your teammates or co-presenters. Share tasks and work simultaneously to create a powerful presentation.

Our First Synthesis

Wow any audience with your Canva presentation. Design, plan, and present all in one place.

Our Second Synthesis

Wow any audience with your Canva presentation. Design, plan, and present all in one place.

Our Third Synthesis

Wow any audience with your Canva presentation. Design, plan, and present all in one place.

GROUP SYNTHESIS

RELATED VIDEO

With Canva Presentations, you can collaborate in real-time and feel like you're in the same room as your teammates or co-presenters. Share tasks and work simultaneously to create a powerful presentation.

THANK YOU!

Do you have any questions for us?
